| 3.4 Known Workarounds | 5 |
| 4.0 DATE/TIME OF OUTAGE..... | 5 |
| 5.0 RELEASE RECOMMENDATION | 5 |

1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- ***Delivered Functionality*** – All requests scheduled for the target point release.
- ***Impacts to the MSIX Environment*** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- ***Deviations from the Test Plan*** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- ***Known Issues*** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- ***Known Workarounds*** – Workarounds that exist in conjunction with the Known Issues.
- ***Recommendation*** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
 - Release with No Issues
 - Release with Minor Issues
 - Release with Major Issues
 - Do Not Release

2.0 Delivered Functionality

| AMPM Request | Short Description |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 168700 | Grade information on the assessment summary to display assessment interpretation instead of the score |
| 185102 | MSIX password change restriction corrected based on the MSIX password criteria |
| 191240 | Qualifying Move City field length extended |
| 194190 | Student Record View accessed via the State Student ID links will include a hint to the user that they are viewing only the state student information |
| 205027 | Near Match Worklist Items will include a link to display the contact information of the State Data Administrators |
| 210831 | A link to the REACTS web site will be displayed in the left hand navigation bar in MSIX |
| 212277 | The MSIX helpdesk operation hours included in the MSIX Login and Contact Us pages |
| 212348 | Implement Email notification in the worklist re-assignment functionality. Also at the top of the page description has been added to make it clear that currently assigned users are selected by default. You must uncheck them to have them unassigned. |
| 213818 | The Historical Student Record View has been corrected to display the Mexico state name instead of the postal code |
| 213885 | In the Student Mobility Report, "Move To" report has been corrected to display "Move To" information |
| 213940 | OY4-Q2 MSIX Update File Processing Performance Improvement |
| 213944 | Telephone "Extension" field length has been extended to 7 characters |
| 213947 | User Search modified to perform searches using at least one of the three search fields |
| 214006 | New MDE: School District ID supported in the enrollment data element group. |
| 214008 | New MDE Value: "Other" supported in the Assessment Interpretation data element. |
| 214010 | New MDE Values: "Dual Enrollment" and "Concurrent Enrollment" supported in the Course Type data element. |
| 214015 | Included a link to the appropriate Data Administrator for each enrollment record on the Student Historical View |
| 210530 | MSIX worklist aging report corrected to only display unresolved worklist items |

2.1 Deferred Changes

The following changes were deferred to a later release, to allow complete testing and review.

- No deferred changes

3.0 Impact & Exceptions

None

3.1 Impacts to the MSIX Environment:

Impacts to the environment were reviewed. This functional release has no impact to the MSIX environment. The release items include functional enhancements.

3.2 Deviations from the Test Plan

There are no deviations from the test plan.

3.3 Known Issues

There are no known issues

3.4 Known Workarounds

Not applicable.

4.0 Date/Time of Outage

04/02/2011 12:00AM – 04/04/2011 05:00AM EST
